### PROPOSED

LOS ANGELES CO., Calif.—Wm. J. Fox, director of the Los Angeles county building department, has in course of preparation a report he will submit to the county supervisors early next month, suggesting methods of constructing a proposed new county office building at North Spring St. and Sunset Blvd., estimated to cost \$3,000,000. Inquiry made of Federal Government authorities reveals that it will be impossible to revive or reclassify a PWA grant for the project approved in 1933 but permitted to lapse. It is probable that plans for the building will be drawn by a group of local architects, to be selected later.

## SURVEY PARTIES START SURPRISE VALLEY STUDIES

**\$500,000 Project Will Provide  
350-Mile Transmission  
Lines**

Survey parties will start work this week to collect data on which to base plans and specifications for the Surprise Valley Electrification Cooperative's proposed rural electrification project in Modoc and Lassen counties, Calif., and Lake county, Ore., for which the Federal government has allotted approximately \$500,000, according to Chief Engineer Allan Sickler.

The Rural Electrification Administration originally allotted \$360,000 for the project last November. At that time it was proposed to construct 284 miles of distributing lines to furnish energy for 682 customers. A 900-kwh. hydro-electric plant was to be located on Ash Creek near Adin, and sixty-six miles of transmission lines carrying 33,000 volts were to touch Round Valley, Big Valley, Adin and Lookout and extend into Lassen county. Sub-stations were planned for Canby, Davis Creek and Lake City.

### Delayed by Snow

He-ye snow fall in the area prevented any immediate construction during the winter months.

Lately the allotment for the project has been increased to approximately \$500,000. Mr. Sickler went to Washington last month for the purpose of consulting with REA officials with regards to changes in plans.

The new plans call for the substitution of a diesel-electric plant to be constructed near Alturas. The hydro-electric plant has been temporarily eliminated, according to Sickles.

### Transmission Lines

The cooperative now intends to build approximately 350 miles of 12,500-volt transmission lines to serve 850 customers. This is an increase of 66 miles of lines and 260 customers over the original estimate.

"The present plan is to let two contracts," Sickles said, "one for the diesel-electric power plant and one for the transmission lines."

## FRIANT STREET BIDS RECEIVED

SACRAMENTO, March 15. —A. J. Clausen, 686 Cragmont avenue, Berkeley, today submitted a low bid of \$24,905 to Walker Young, Reclamation Bureau construction engineer, for constructing street, alley, parking area and sidewalk grading, surfacing and sewer and water systems for the government camp at Friant Dam site about 22 miles from Fresno.

Frederickson and Watson Construction Co. and Frederickson Bros., Oakland, were second low bidders at \$25,694. W. J. Tobin, Oakland, was third with a figure of \$29,300. Seven bids in all were received for the contract.

## 11 DIRECTORS ARE NAMED BY S. F. EXCHANGE

**Friday Ballot Results Are Announced; Will Elect Officers Soon**

Officers to serve during the coming year will be elected soon, when newly elected directors of the San Francisco Builders' Exchange hold their first regular meeting, it was announced yesterday.

Eleven new directors were named Friday when the exchange held its annual membership meeting.

Those elected, and the groups by whom they were nominated, were: Joseph Ahlback, plumbing and heating; J. W. Bender, roofing contractors; Chas. W. Carle, reinforcing steel dealers; Sam Cohn, painters and decorators; R. J. H. Forbes, concrete contractors.

W. H. George, building material dealers; Wm. G. Gilmour, master plasterers; Emil Hogberg, masons and builders; Jos. B. Keenan, marble dealers; H. N. Patterson, ornamental iron manufacturers, and A. H. Wilhelm, general contractors.

## BASICH BROS. BID PLACER PAVING JOB

**\$122,902 Figure Submitted by  
Torrance Firm on State  
Project**

SACRAMENTO, March 17. — Basich Bros., 20550 Normandie avenue, Torrance, today submitted a low bid of \$122,902 to the State Highway Commission here for grading and paving about two and nine-tenths miles in Placer county.

Six contractors submitted figures for the work, with a surprisingly narrow range of bids.

Total bids were as follows:

Basich Brothers .....	\$122,902
N. M. Ball Sons & Larsen Bros., Berkeley .....	124,770
A. Teichert & Son, Inc., Sacramento .....	127,488
Frederickson & Watson & Frederickson Bros., Oakland .....	128,101
Hanrahan Co., S. F. ....	129,054
Frederickson & Westbrook Lower Lake .....	129,466

The project, which is located between Rocklin and Loomis, calls for portland cement concrete pavement, of which about 6900 cubic yards will be required. Other bidding items included 43,000 cubic yards roadway excavation, 372,000 station yards overhaul, and numerous others.

## G-E ORDERS, SALES INCREASES REPORTED

President Gerard Swope of General Electric Co., has announced that orders received during the first two months of 1937 amounted to \$64,000,000, an increase of 79 per cent over the corresponding period last year, and that sales billed in the first two months were \$45,000,000, an increase of 39 per cent over the same period last year.

The Directors today declared a dividend of 40 cents a share for the first quarter, payable on April 26, 1937, to stockholders of record on March 19, 1937.

## BIDS APRIL 14 ON BEAR RIVER LEVEE PROJECT

U. S. Engineer Office Will  
Receive Proposals in  
Sacramento

Bids for constructing and strengthening two levees on the Bear River near the Feather River have been called for April 14 by the United States Engineer Office in Sacramento.

The North levee will be three miles long and will require the placing of 402,000 cubic yards of earth. It will be located on the north side of the Bear River from the Feather River to the Sacramento-Northern railroad bridge.

The South levee, near the mouth of the Bear River, will be 0.3 mile long and will require 102,000 cubic yards of earth.

Principal items include: 504,000 cubic yards levee embankment in place; 315 pounds reinforcing steel 482 feet corrugated iron pipe of various sizes, and 1,100 sq. yds. of concrete highway surfacing.

### Incidental Work

The contract calls for raising and strengthening the existing levee, construction of a new levee, and performance of all incidental operations in connection with the work, such as clearing, grubbing, and ploving the right of way, and moving and reconstructing fences.

In most cases the levee will be so constructed as to provide a net cross section having a crown width of 12 feet, a land slope of 1 vertical on 2 horizontal, and a river slope of 1 vertical on 3 horizontal.

Specifications may be obtained from the War Department, U. S. Engineer Office, 208 Post Office Building, Sacramento. No deposit is required.

## LUMBER CONDITIONS REMAIN UNCHANGED

A total of 171 down and operating mills in Washington and Oregon which reported to the West Coast Lumbermen's Association for the week ending March 6 produced 101,177,114 board feet of lumber, or 64.2 per cent of its average weekly cut during 1926-29, the association reports.

## Eaton & Smith Submit \$713,000 Low Bid For Sacramento Depot Supply Buildings

SACRAMENTO, March 25.—Eaton & Smith, 715 Ocean avenue, San Francisco, today submitted a low total bid of \$713,000 to Major Arthur W. Parker, Constructing Quartermaster, for construction of a supply building, head-house and warehouse wings at the U. S. Army air depot here.

Eleven proposals were received for the contract, one of the larger jobs in the \$7,000,000 project.

Robert E. McKee, El Paso, Tex., was second low bidder with a proposal of \$717,000.

The contract calls for construction of a two-story depot supply building and headhouse, and one-story east and west wings of the warehouse. The buildings will be of reinforced concrete and steel construction, conforming in general with other structures at the depot. Plans are by the office of the Quartermaster General, Construction Division, with headquarters in Washington, D. C.

### Total Bids

Total bids received today were as follows:

Eaton & Smith, San Francisco, \$713,000.

Robert E. McKee, El Paso: \$717,000.

N. P. Severin Co. Chicago: \$719,500.

K. E. Parker Co., San Francisco \$739,900.

Clinton Constr. Co., San Francisco: \$762,000.

MacDonald & Kahn Co., Ltd., San Francisco: \$769,967.

Villadsen Bros., Oakland: \$785,800.

Barrett & Hilp, San Francisco, and A. Teichert & Son, Inc., Sacramento: \$787,810.

George A. Fuller Co., Los Angeles: \$828,000.

Geo. Pollock, Sacramento: \$830,726.

Guy F. Atkinson Co., San Francisco: \$846,939.

### Telegraphic Reduction

The bid of N. P. Severin Co., originally was \$1,250,000, but was modified by a telegraphic reduction of \$530,500.

Major Parker has announced award of a \$34,698 contract for construction of the water distribution system at the base to Underground Construction Co., No. 6 Alvarado road, Berkeley.

## OREGON OKEHS 48 MILLIONS FOR HIGHWAYS

Biennial Road Appropriation  
Bill Is Signed By  
Governor

The State of Oregon will have available for highway work during the next two years up to \$48,392,747, it was revealed following the signing by Governor Martin of Senate Bill 410, providing for the appropriations.

Work authorized under the bill is classified as follows:

Secondary highway work by counties and cities, \$17,000,000.

Primary highway construction \$10,500,000.

Salaries and operations of highway department, \$120,000.

Appropriations in anticipation of federal grants, \$12,000,000.

Maintenance of primary routes including ferries, \$3,540,000.

Special maintenance of primary highways, \$1,135,000.

Emergency work on primary highways, \$500,000.

Highway equipment fund, \$3,000,000.

Capital outlay (buildings) \$267,747.

Highway transportation commission, \$20,000.

In addition to the amounts listed in Senate Bill 410, three re-appropriation bills were approved earlier last week, providing \$6,680,600 to take care of needs arising from insufficient appropriations by the 1935 legislature.

## FIRST VALLEY CONSTRUCTION WORK IS LET

Job Initiates \$170,000,000  
California Water  
Project

WASHINGTON, D. C., Mar. 23.—Award of the first contract for actual construction work on the \$170,000,000 Central Valley Project in California was announced here today by Commissioner John C. Page of the U. S. Bureau of Reclamation.

The contract, for construction of a four-mile unit of the Contra Costa Conduit, was let to Haas, Doughty & Jones & Marshall & Stacy, Merchants' Exchange Building, San Francisco, at \$102,646.

The award was considered the starting gun for the big reclamation project, which includes two major dams and which not only will provide fresh water for arid or saline regions but also will produce power and includes many flood control and navigation features.

### Many Bidders

When bids were opened recently in Sacramento by Construction Engineer Walker R. Young, the conduit contract attracted proposals from 25 firms in all parts of the United States.

Mr. Young reported this week that negotiations for rights of way for the conduit are proceeding satisfactorily, although one section of land remained in doubt.

Bids already have been taken for considerable work at the government camp at Friant Dam site near Fresno, and others are to be received soon.

### Track Relocation

Next major construction contract to be advertised, bureau officials indicated, will be for either a second section of the conduit or relocation of the Southern Pacific tracks at Kennett. The latter is one of the larger contracts in the program.

Mr. Young has reported that preliminary work is virtually complete. Some 400 men have been employed in preparing plans, making surveys and other advance work. Of these, 35 are in the Sacramento headquarters office, 120 are at the site of Kennett Dam and other portions of the project near Redding, 50 are at Friant, 30 along the route of the Contra Costa conduit, and 150 are employed by various contractors working on minor assignments.

### BURNER SHIPMENTS GAIN

Shipments of oil burners during January, 1937, amounted to 9,274 units, a substantial increase over the total of 7,712 shipped during the same month in 1936, according to the monthly report of the Bureau of Census.

## BOARD APPROVES S. F. WAGE RULE

An amendment to the contract procedure ordinance requiring that city employees working on jobs for which a city department has been the successful bidder against private contractors for public work, he paid prevailing wages has been given final passage by the San Francisco Board of Supervisors.

The amendment was proposed by Controller Leonard S. Leavy and approved by the Board's finance committee. The amendment is not retroactive and will have no effect on any jobs now being done by city departments. Chief Clerk Sid. J. Hester of the Department of Public Works said yesterday.

## BIDS TO OPEN APRIL 16 FOR L. A. GRADING

Sweetser Authorizes Angeles  
Crest Project for  
Advertising

District Engineer C. H. Sweetser of the Bureau of Public Roads yesterday issued a call for bids, to be opened April 16, for grading 3.26 miles of Section D, Route 61 of the Angeles Crest National Forest Highway in Los Angeles county. Approximately \$185,000 has been programmed for work on this section.

Principal items include: 32 acres of clearing and grubbing; 345,700 cubic yards unclassified excavation; 1,700 cubic yards excavation for structure, and 10,190 pounds of reinforcing steel.

Bids will be opened on two other jobs in April by the Bureau Both are scheduled for the 13th. They are for 4.84 miles of grading and surfacing in Apache county, Arizona, and 2.3 miles of grading on Route 32 of the Placerville-Lake Tahoe National Forest Highway.

### Tuolumne Projects

The only Bureau jobs for which bids will be opened this month are located in Tuolumne county. On March 30 bids will be opened for the construction of the South Fork of the Tuolumne River Bridge and approaches. The work is located on Section A1 of Route 4, of the Tioga Road in Yosemite National Park.

Bids for 2.1 miles of grading and placing subgrade reinforcement on Section A2, Route 4 of the Tioga Road will be opened on the same date. Items in the contract include: 46,000 cu. yds. unclassified excavation; 5,500 cu. yds. sod excavation; 1,410 lin. ft. corrugated metal pipe, and 75,000 sta. yds. overhaul.

## SHOP EQUIPMENT FOR AIR DEPOT IS ADVERTISED

Bids April 22 on Machinery  
For Sacramento Base  
Utilities Shop

SACRAMENTO, Mar. 23.—Bids for the first group of machines and equipment for the utilities shops at the \$7,000,000 Sacramento army air depot will be opened here April 22, Major Arthur W. Parker, constructing quartermaster, announced today.

Twenty-two separate types of equipment are listed in the bid call.

They include a 36-inch band saw, single spindle vertical borer, single cylinder surfacer, 9-inch jointer, lathe, shaper, 36-inch forming machine and numerous others.

Equipment is to be delivered f.o.b. Sacramento within 60 days of the date of award, Maj. Parker said.

Bids for machines and equipment differing in details of design and construction from those specified will be considered, provided the bidder states the differences in his bid. Alternates, however, must be equal to or better than those specified, in the opinion of the purchasing officer.

Catalogs and full descriptive matter are to be furnished with the bids, which will be opened at 2 P. M. at the air depot.

## Edwin J. Symmes Work Continued By Partnership

Partnership association of Mrs. Edwin J. Symmes and Stanton Willard, Architect, for the practice of architecture in Bakersfield is announced by Mr. Willard. The new firm will have offices at 215 Haberfelde building, and will carry on the work of the office of Edwin J. Symmes, in which Mrs. Symmes was associated with Architect William C. Hays of San Francisco and Architect Ira W. Hoover of Los Angeles.

Mr. Hoover will continue his association as consultant in the new office, Mr. Willard said.

## ELECTRODE BOOKLET PUBLISHED BY PAGE

A new booklet No. DH-984 covering Page Hi-Tensile F Electrode has just been issued. This booklet describes this shielded arc electrode in detail and the shielded arc method of welding, with illustrations showing the procedure for various types of welds. The Page Hi-Tensile F Electrode is a general purpose electrode of the shielded arc type suitable for all welding positions, according to the manufacturer.

**33— WATER WORKS**

**BONDS VOTED**

**REDDING**, Shasta Co., Calif.—A proposal to issue \$200,000 in bonds to finance acquisition of the present water system or construction of a new system was approved by a vote of 1446 to 280 at a special election held in Redding March 16.

The money will be used either for purchase of the present properties of the California Water Service Corp., or if the price asked by that company continues to be excessive, for the construction of a complete new water distribution system.

The City has applied to the PWA for a grant of \$153,800 to assist in financing construction of the new system, but if the federal grant is not allotted the \$200,000 in bond money will be sufficient to construct a system equal to that now in operation.

W. K. Adams, City Engineer.

#### BIDS OPENED

**SAN FRANCISCO.**—San Francisco Water Department, 425 Mason St., at \$2,022.50, submitted low bid to the Public Utilities Commission, City Hall, under Spec. No. W.D. 139, for relaying of city pumps discharge main at Ocean View Gulch, San Francisco.

The work includes the relaying of approximately 375 ft. of 23-in. steel

pipe and the laying of 155 lf. of 24-in. steel pipe at Ocean View Gulch.

The work involves:

- (1) 530 lf. excav. and backfill for trench, for 23-in. and 24-in. diam. pipe;
  - (2) 25 c.y. additional excavation and backfill for trench below grade;
  - (3) Installation of steel pipe:
    - (a) 375 lf. 23-in. diam.;
    - (b) 155 lf. 24-in. diam.;
  - (4) Six roundabout seams, fabrication of bends, from 23-inch and 24-inch diameter pipe.

#### CONTRACT AWARDED

REDDING, Shasta Co., Calif.—Lindo Nursery, Chico, at \$2,579, awarded contract by the Procurement Division for seeding and planting the grounds of the U. S. Post Office at Redding.

### SAN BERNARDINO CO.—GENE WASH & COPPER BASIN DAMS—(District)

**SAN BERNARDINO CO., Calif.**—J. F. Shea Co., Inc., 617 South Olive St., Los Angeles, at \$594,207.51, as previously reported, submitted low bid to the Metropolitan Water District, Los Angeles, under Specification No. 190, for the construction of the Gene Wash and Copper Basin Dams.

The work is located in San Bernardino County, 13 to 20 miles by road northeast of Earp, Calif., and is comprised in two schedules as follows: Award will not be made to more than one bidder nor for less than all the items of the work.

**Schedule 1:** Includes the construction of a concrete arch dam at Gene Wash with a maximum height of about 156 feet and a crest length of 430 ft.; an ogee concrete spillway dam with non-overflow gravity extensions having a maximum height of about 34 ft., and a total length of 460 feet; and two reinforced concrete faced dykes with a maximum height of 25 ft. and a total length of 1360 ft.

**Schedule 2:** Includes the construction of a concrete arch dam across the outlet of Copper Basin, with a maximum height of about 210 ft. and a crest length of 220 ft.; an ogee concrete spillway dam with non-overflow gravity extensions for Copper Basin Reservoir, having a maximum height of about 18 ft. and a length of 290 ft.; and a reservoir outlet structure at the entrance to the Whipple Mountain tunnel.

The work involves:

#### SCHEDULE 1

Construction of the Gene Wash dam spillway, and appurtenant works.

- (1) 6,500 c.y. excav., unclass., for foundation of dam;
- (2) 11,000 c.y. excav., unclass., for foundation and approach to spillway;
- (3) Does not apply here;
- (4) 4,000 c.y. excav., unclass., for earthfill dike;
- (5) 600 c.y. excav., unclass., for cut-off wall—earth-fill dike;
- (6) 10,500 c.y. earth fill in reservoir dike;
- (7) 1,500 c.y. backfill;
- (8) 50 c.y. compacted backfill;
- (9) 5,000 lf. drilling grout and anchor-holes; footage not more than 25 feet deep;
- (10) 1,000 lf. drilling grout holes; footage more than 25 and not more than 50 feet deep;
- (11) 375 lf. drilling grout holes; footage more than 50 and not more than 100 feet deep;
- (12) 13,000 lbs. installing grout pipes and fittings for dam and spillway foundations;
- (13) 1,000 lbs. installing grout pipes and fittings for contraction joints;

- (14) 21,000 lbs. installing metal tubing, pipe, and fittings for concrete cooling system;
- (15) Furnishing, installing, and operating concrete cooling plant complete, lump sum;
- (16) 6,500 cu. ft. pressure grouting; foundations;
- (17) 225 cu. ft. pressure grouting; contraction joints and cooling pipes;
- (18) 13,000 c.y. concrete in dam;
- (19) 3,200 c.y. concrete in spillway;
- (20) 500 c.y. concrete paving on dike;
- (21) 700 c.y. concrete in cut-off wall & dike;
- (22) Does not apply here;
- (23) 20 c.y. concrete in trash rack structure for dam;
- (24) 160 c.y. concrete in valve house structure for dam;
- (25) 110 c.y. concrete in parapet and railing overhang;
- (26) Does not apply here;
- (27) 75 c.y. gunite or equivalent coating of rock;
- (28) 52,700 lbs. fabricating and placing reinforcement steel and anchor bars;
- (29) 35,000 lbs. installing metal sealing strips in construction and contraction joints of dam and spillway;
- (30) 20,000 lbs. installing cast-iron sluiceway pipe;
- (31) Does not apply here;
- (32) 30,000 lbs. installing trash rack metal work in sluiceway;
- (33) 25,000 lbs. installing sluiceway slide gate and operating mechanism;
- (34) Does not apply here;
- (35) 25,000 lbs. installing discharge valve and operating mechanism for dam;
- (36) 15,000 lbs. installing miscellaneous metal work;
- (37) 11,000 lbs. installing pipe hand-railings;
- (38) Does not apply here;
- (39) 7,500 ton-miles hauling steel;
- (40) 92,000 ton-miles hauling cement;
- (41) Overhaul of concrete aggregates, fixed at seven cents (\$0.07) per ton-mile;
- (42) Clearing reservoir site, lump sum.

#### SCHEDULE 2

Construction of the Copper Basin dam, spillway, and appurtenant works.

- (1) 5,500 c.y. excav., unclass., for foundation of dam;
- (2) 4,500 c.y. excav., unclass., for foundation and approach to spillway;
- (3) 1,000 c.y. excav., unclass., in reservoir outlet works;
- (4) to (6) Do not apply here;
- (7) 4,500 c.y. backfill;
- (8) 1,500 c.y. compacted backfill;
- (9) 4,500 lf. drilling grout and anchor holes; footage not more than 25 feet deep;

- (10) 1,300 lf. drilling grout holes; footage more than 25 and not more than 50 feet deep;
- (11) 375 lf. drilling grout holes; footage more than 50 and not more than 100 feet deep;
- (12) 12,000 lbs. installing grout pipes and fittings for dam and outlet foundation;
- (13) 4,500 lbs. installing grout pipes and fittings for contraction joints;
- (14) 20,000 lbs. installing metal tubing, pipe, and fittings for concrete cooling system;
- (15) Furnishing, installing, and operating concrete cooling plant complete, lump sum;
- (16) 6,100 cu. ft. pressure grouting—foundations;
- (17) 210 cu. ft. pressure grouting—contraction joints and cooling pipes;
- (18) 14,000 c.y. concrete in dam;
- (19) 450 c.y. concrete in spillway;
- (20) and (21) Do not apply here;
- (22) 2,215 c.y. concrete in reservoir outlet structure exclusive of superstructure;
- (23) 25 c.y. concrete in trash rack structure for dam;
- (24) 190 c.y. concrete in valve house structure for dam;
- (25) 60 c.y. concrete in parapet and railing overhang;
- (26) Constructing gate house superstructure above elevation 1042 for outlet work complete, lump sum;
- (27) 40 c.y. gunite or equivalent coating of rock;
- (28) 500,000 lbs. fabricating and placing reinforcement steel and anchor bars;
- (29) 25,000 lbs. installing metal sealing strips in contraction joints of dam;
- (30) 40,000 lbs. installing cast-iron sluiceway pipe;
- (31) 50,000 lbs. installing trash rack metal work in outlet works;
- (32) 45,000 lbs. installing trash rack metal work in sluiceway;
- (33) 40,000 lbs. installing sluiceway slide gate and operating mechanism;
- (34) 150,000 lbs. installing slide gate and operating mechanism for outlet works;
- (35) 30,000 lbs. installing discharge valve and operating mechanism for dam;
- (36) 50,000 lbs. installing miscellaneous metal;
- (37) 6,000 lbs. installing pipe hand-railings;
- (38) 1,800 lbs. installing electrical metal conduit and boxes;
- (39) 6,000 ton-miles hauling steel;
- (40) 60,000 ton-miles hauling cement;
- (41) Overhaul of concrete aggregate, fixed at seven cents (\$0.07) per ton-mile;
- (42) Clearing reservoir site, complete, lump sum.

- (43) 1,300 lf. drilling grout holes; footage more than 25 and not more than 50 feet deep;
- (44) 375 lf. drilling grout holes; footage more than 50 and not more than 100 feet deep;
- (45) 12,000 lbs. installing grout pipes and fittings for dam and outlet foundation;
- (46) 4,500 lbs. installing grout pipes and fittings for contraction joints;
- (47) 20,000 lbs. installing metal tubing, pipe, and fittings for concrete cooling system;
- (48) 6,100 cu. ft. pressure grouting—foundations;
- (49) 210 cu. ft. pressure grouting—contraction joints and cooling pipes;
- (50) 14,000 c.y. concrete in dam;
- (51) 450 c.y. concrete in spillway;
- (52) and (53) Do not apply here;
- (54) 2,215 c.y. concrete in reservoir outlet structure exclusive of superstructure;
- (55) 25 c.y. concrete in trash rack structure for dam;
- (56) 190 c.y. concrete in valve house structure for dam;
- (57) 60 c.y. concrete in parapet and railing overhang;
- (58) Constructing gate house superstructure above elevation 1042 for outlet work complete, lump sum;
- (59) 40 c.y. gunite or equivalent coating of rock;
- (60) 500,000 lbs. fabricating and placing reinforcement steel and anchor bars;

## BUREAU OPENS BIDS FOR TWO TUOLUMNE JOBS

### Ralph Bell Low on Grading; Howkins Bids Bridge

Bids for more than \$134,000 worth of construction work in Tuolumne County were opened in the office of the Bureau of Public Roads yesterday, with Ralph A. Bell and B. A. Howkins low bidders on two contracts.

Ralph A. Bell, Portland, at \$101,494.20, submitted the low bid for grading and placing subgrade reinforcement on 2.1 miles of Section A, Route 2 of the Tioga Road. No other bids were received. Bell qualified his bid with the stipulation that if he receives a recommended award on a General Grant approach road contract, his bid will be withdrawn. District Engineer C. H. Sweetser recommended that the award be made March 15. Bell's bid on the job was \$366,191.20. Confirmation is expected from Washington within the next few days.

Principal items in the contract are: 46,000 cubic yards of unclassified excavation on which Bell bid \$1.65 per cubic yard; 5,500 cubic yards sod excavation at 75c per cubic yard, and 1410 feet of CMP at various prices.

### Bridge Contract

The second job, for constructing the South Fork of the Tuolumne River bridge and approaches on Section A1, Route 4 of the Tioga Road, attracted five bidders. Prices ranged from \$32,608.50 to \$35,810.

B. A. Howkins, San Francisco, submitted the low bid of \$32,608.50. Second low was Parish Bros., Hollywood, at \$33,476. E. T. Lesure, Ralph A. Bell and John Rocca followed in the order named.

### BURNER STOCKS DOUBLE

Stocks of distillate oil burners on hand at the end of January, 1937, amounted to 40,417 units, more than twice the stock recorded for the end of January, 1936 which totalled 20,165 units, according to the monthly report of the Bureau of Census.

## J. H. Pomeroy Low Bidder at \$536,960 For Eastbay Yard Superstructure Job

With a total proposal of \$536,960, J. H. Pomeroy & Co., Inc., 333 Montgomery street, San Francisco, yesterday submitted the lowest of five bids to the State Department of Public Works for constructing the East Bay yard superstructure for the San Francisco-Oakland Bay Bridge rail facilities.

Bidding was extremely close, the second low proposal of Barrett & Hilp, San Francisco, being less than \$730 above the figure submitted by Pomeroy.

Total bids for the contract were:  
J. H. Pomeroy..... \$536,960  
Barrett & Hilp..... 537,689  
Bates & Rogers, S. F..... 548,689  
Clinton Const. Co., S. F..... 556,028  
C. W. Caletti & Co., San

Rafael..... 587,586

May Eliminate Overhead

As in the East Bay yard superstructure contract, awarded recently to Bates and Rogers, elimination of those items covering construction of the Port of Oakland overhead is left to the discretion of bridge engineers. Should they be eliminated the contractor will not be entitled to compensation for work covered in those items, according to terms of the contract.

Although only five contractors submitted bids today, interest in the figuring brought a crowd to the Bay Bridge offices at 500 Sansome street.

The opening of bids on the superstructure contract advanced the bridge rail work a step further. Contracts already have been awarded for the yard substructure and for signal and interlocking equipment.

## MINERAL SOCIETY OPENS LABORATORY

The Northern California Mineral Society has opened its headquarters and laboratory in the Hansford Building, 268 Market street. J. H. Spohn, the secretary, says the laboratory is for the use of members only, but that the monthly lectures held at the Civic Center Public Library on the second Wednesday of the month, will, as in the past, be open to the public. Past lectures on glass, paint pigments, abrasives, etc., have been well attended by members of the construction industry, the secretary says.

## FISHER-McNULTY LOW ON FRESNO MASONIC TEMPLE

### Fresno Firm Bids \$126,982 For Scottish Rite Building

FRESNO, March 29.—Fisher & McNulty, 327 Cory building, Fresno, today submitted a low bid of \$126,982 to local officials of the Scottish Rite for construction of a new Masonic temple here.

Frank Hudson, 2141 South Van Ness avenue, Fresno, was low bidder for mechanical work, with a proposal of \$28,500. The electrical contract already has been let to Electric Construction Co., P. O. Box 638, Fresno.

Total bids for the general contract were:

Fisher & McNulty.....	\$126,982
Trewhitt, Shields & Fisher,	
Fresno .....	127,645
Harris Const. Co., Fresno	135,422
W. J. Ochs, Fresno.....	138,116
W. G. Thornally, Oakland.	154,780
Midstate Const. Co. Fresno	174,871

### Mechanical Bids

Total bids for mechanical work were:

Frank Hudson .....	\$28,500
B. A. Newman Co., Fresno.	29,030
Barrett-Hicks Co., Fresno.	30,822

Plans were prepared by Architects Frederick L. Swartz and W. D. Coates of Fresno, with F. W. Kellberg of San Francisco as structural engineer, G. M. Simonson of San Francisco as mechanical engineer, and Carl Wolf of Fresno as electrical engineer.

## AWARD EASTBAY SUPERSTRUCTURE TO LOW BIDDER

### Pomeroy Wins \$536,960 Span Rail Facility Contract

SACRAMENTO, April 7.—Award of the second contract for construction of the East Bay Yard for the San Francisco - Oakland Bay Bridge rail facilities was announced here today by Chief Engineer C. H. Purcell.

The contract went to J. H. Pomeroy, whose bid of \$536,960 was the lowest of five submitted to bridge engineers last week, and calls for construction of the yard superstructure.

The substructure contract was awarded recently to Bates & Rogers Construction Co., San Francisco, at \$684,802.

Both superstructure and substructure contracts, when advertised, included the stipulation that items covering construction of the Port of Oakland overhead might be eliminated at the discretion of bridge engineers, and that if so eliminated, contractors would not be entitled to compensation for any such items.

#### Structural Steel

Principal items in the superstructure contract were 1,310,000 pounds structural steel in the Southern Pacific overhead and Twenty-sixth street crossings; 1,400,000 pounds structural steel in Catenary bridges; and 1,700,000 pounds structural steel in the Port of Oakland overhead.

Award of the superstructure contract to Pomeroy brought to three the number of contracts let or the rail system, which late next year or early in 1939 will carry commuter traffic between San Francisco and Eastbay communities.

Contract for furnishing and installing signal and interlocking equipment was awarded some time ago.

Shipments of windmills in 1936 amounted to 70,125 units, almost 20,000 higher than the total for the twelve months of 1935 of 51,713, the Bureau of Census reports.

### MATERIAL PRICE LEVEL UNCHANGED

The wholesale price index for building materials during the week ended March 27 remained at the same level established during the preceding week, when the price average reached the highest point since the spring of 1929, the U. S. Bureau of Labor Statistics reported yesterday. The index, 96.2 per cent of the 1926 level, was not affected by higher average prices for brick and tile, which were offset by slightly lower lumber prices, the bureau reported.

## OPEN PROPOSALS FOR WAREHOUSE IN EMERYVILLE

### W. G. Thornally Submits the Lowest Basic Figure at \$151,900

W. G. Thornally, Builders' Exchange building, Oakland, at \$151,900, yesterday submitted the lowest of thirteen basic bids to Architect Will G. Corlett for construction of a new warehouse in Emeryville for J. Catucci, to be occupied by the Bigelow - Sanford Carpet Company of New York.

Since five alternate proposals were included in the bidding schedule, award of the contract may be affected by choice of alternatives, it was indicated.

Total basic bids for the structure were as follows:

## MATICH BROS. LOW FOR L. A. PAVING JOB

### B. G. Carroll Bids San Diego Overpass Contract At \$47,763

LOS ANGELES, April 8.—Matich Brothers, Elsinore, at \$161,365.50, submitted the low bid to the State Division of Highways today for approximately 3.5 miles grading and paving with portland cement concrete and plant-mix surfacing in Los Angeles County.

At the same opening B. G. Carroll, San Diego, submitted the low bid of \$47,763 for construction of a reinforced concrete girder crossing over the A. T. & S. F. Ry. tracks near San Onofre in San Diego County.

The Los Angeles County job involved a section of highway between Center street and Firestone boulevard in Los Angeles. The principal items include: 45,500 cu. yds. unclassified excavation; 110 tons grade E asphalt; 18,000 tons imported subgrade material, and 1080 tons liquid asphalt.

Second low bidder was Oswald Brothers, Los Angeles, at \$163,582.50. B. G. Carroll and C. B. Grove were third at \$170,687.20.

The San Diego County contract calls for the construction of a girder crossing consisting of one 73-foot span, two 53-foot spans, and two 30-ft. spans on concrete bents and abutments with wing walls.

The crossing will pass over the Acheson, Topeka and Santa Fe Railway tracks near San Onofre. Principal items include: 1,100 cu. yds. unclassified excavation; 275,000 pounds reinforcing steel bar; 1,420 cubic yards Class A portland cement concrete; and 3,130 lbs. cast steel rockers and bearings.

Paris Bros., Los Angeles, were second low bidders at \$48,840, followed by C. O. Sparks and Mundo Engineering Co., at \$49,051.50.

Next bid opening for a Division of Highways project in the southern part of the state is scheduled for April 21. Bids will be opened for about 0.6 mile grading and surfacing with asphalt concrete, and the widening of a reinforced concrete bridge in Santa Barbara County.

## BUREAU INVITES BIDS ON SIERRA SURFACING JOB

Proposals Opening April 27th  
For 7.9-Mile Forest  
Road Contract

District Engineer C. H. Sweetser of the Bureau of Public Roads issued a call for bids, to be opened April 27, yesterday for placing base and surface courses on approximately 7.9 miles of Sections B and C, Route 27 of the Sierraville-Hobart National Forest Highway in Sierra and Nevada counties.

Principal items include: 1,000 cu. yds. unclassified excavation; 300 cu. yds. unclassified excavation for structures; 31,400 tons 2-in. heavy crushed rock base course; 27,900 tons crusher run top course; and 7.9 miles fine grading sub-grade and shoulders.

Plans and specifications may be obtained from Sweetser's office in the Federal Office Building upon deposit of \$10.

### Two Other Jobs

The Bureau of Public Roads has two other jobs out for bids, one to be opened April 13.

The first is for 2.3 miles grading of Section 11, Route 32 of the Placerville-Lake Tahoe National Forest Highway in Eldorado county. Principal items include: 156,500 cubic yards unclassified excavation 3,800 cubic yards unclassified excavation for structures; 55,200 lbs. reinforcing steel and 5,150 pounds structural steel.

On April 16, bids will be opened for approximately 3.2 miles grading on Section D, Route 61, of the Angeles Crest National Forest Highway in Los Angeles county. The job involves 32 acres of clearing and grubbing.

Principal items include: 345,700 cubic yards unclassified excavation; 1,700 cubic yards excavation for structures; 132 cubic yards concrete, and 10,190 pounds of reinforcing steel.

## 250-WATT MERCURY LIGHT REFLECTOR

Westinghouse Enclosed Aluminum Dome Type Low Mounting units provide intensive general illumination where the mounting light is not over 20 feet, says a recent bulletin of the firm. Higher intensities are provided on the working plans, with minimum losses on the side walls. The unit consists of deep bowl type aluminum reflector, a dust-tight cover, various types of hoods for 1/2-inch conduit and outlet box mounting.

### CASTING SHIPMENTS UP

Shipments of malleable iron castings for the first two months of 1937 amounted to 107,496 tons compared with 82,770 and 78,832 short tons for the same periods in 1936 and 1935, respectively, the Bureau of Census reports.

## ARIZONA BIDDER LOW ON ELY P. O.

WASHINGTON, D. C., Apr. 6.—With a proposal of \$65,800 E. and E. J. Pfozter, Mesa, Ariz., today submitted the low bid to the U. S. Treasury Department for construction of the post office building at Ely, Nevada.

Second low bidder for the Nevada post office job, treasury department officials reported, was Lundberg-Richter Co., Inc., of Fredericksburg, Va. The eastern firm's basic bid for the general contract amounted to \$68,950.

All bids were taken under advisement.

## 'Compression Wood' May Cause Warping, Laboratory Reports

Compression wood in boards from coniferous trees may cause bowing, twisting and warping, says a recent bulletin issued by the Forest Products Laboratory, maintained by the U. S. Forest Service at Madison, Wis.

Outlining development of such difficulties, the bulletin states:

"Compression wood troubles usually develop in lumber from the lower side of a large branch or the lower side of a leaning tree trunk. Pressure from the weight of the branch or the top of the leaning tree deforms the individual cells. When the lumber is sawed and the pressure removed, these abnormal cells begin to misbehave with every change in moisture. The wood fibers on opposite sides of a board do not shrink and swell in the same way and in the same proportion. Such lumber bends and twists and pulls out of shape. Compression wood is low in strength for its weight and hard to nail or work with tools. It can be identified in logs by the eccentric annual growth rings."

### Timber Bind

Compression wood, the bulletin explains, is known, also by the terms "hard grain" and "timber bind" in the English speaking countries. Rothholz is the common German name, derived from the color of the wood. The French term bois rogue gives some indication of the variable and defective nature of the material.

Good forest management cuts out the leaning trees to give straight trees the space. Lumber buyers can avoid trouble by learning to recognize the peculiarities in grain and growth that identify compression wood. These are described and illustrated in Technical Bulletin 546-T, "Structure, Occurrence and Properties of Compression Wood," by M. Y. Pillow and R. F. Luxford of the Forest Service. It gives the results of a

\$150,000 Ingold Salesrooms,  
\$80,000 Can Factory  
Contracts Let

Award of two large San Francisco industrial building contracts to Barrett & Hilp, 918 Harrison street, was announced Saturday by the contracting firm.

Larger of the two jobs is construction of the new sales and service building for Ernest Ingold, Inc., to be erected on Van Ness Ave. between O'Farrell and Olive streets at an estimated cost of approximately \$160,000.

The other contract is for an extension to the Western Can Company plant at Seventeenth and Rhode Island streets, which is expected to cost about \$80,000.

The Ingold building on Van Ness avenue will be the largest of its type constructed here in recent It will be three stories in height, of reinforced concrete, and will cover an area of 120 by 180 feet.

### Dinwiddie, Fisher

Plans for the Ingold sales and service building have been prepared by Architect J. E. Dinwiddie, 360 Pine street, with Alfred P. Fisher, 111 Sutter street, as structural engineer.

The Western Can company addition will be constructed on the Mariposa street side of the present plant at Seventeenth and Rhode Island streets, officials of the firm said Saturday.

It will be of reinforced concrete construction, to correspond with the existing buildings, and will contain all facilities for a modern can factory, including an elevator and spiral chutes. Excavations for the extension is to start Wednesday morning.

Plans for the Western Can job were prepared by Engineer Leeland S. Rosener, 233 Sansome St.

## \$2,452 LOW BID FOR BEAR RIVER LEVEE

**Erison Knudsen Co. Submits  
Lowest of Twelve  
Proposals**

SACRAMENTO, April 14.—Erison-Knudsen Co., 1121 Title guarantee building, Los Angeles, today submitted a low bid of \$72,000 to the U. S. Engineer office for levee work on the Bear river.

Twelve proposals, with a bid range of more than \$62,000, were received by Lieut.-Col. L. B. Chambers, district engineer.

Work includes raising and strengthening existing levees and constructing new levee along the north and south banks of the Bear river between Feather River and Sacramento-Northern railway bridge.

## BLISH PAMPHLET ON RUBBER FLOORING

A booklet describing Voorhees Pad sheet rubber flooring has been issued by Voorhees Rubber Mfg. Co., 125 East Forty-first Street, New York City. The brochure includes specifications for resilient floor covering, as well as illustrations of a number of applications. Copies may be obtained by writing the manufacturer.

## MATERIAL PRICE ADVANCE RESUMES

The building material wholesale price index, as reported by the U. S. Bureau of Labor Statistics, rose again during the week ended April 3 to reach 96.6 per cent of the 1926 level. The 0.4 per cent increase according to the bureau, was due chiefly to continued advances in wholesale lumber prices, together with rising prices for paving brick, china-wood and linseed oils, gravel and sand. Average prices for yellow pine lath, red lead, litharge, rosin, turpentine and plaster board were lower. Prices of cement and structural steel remained firm.

## CHAPTER PLANS APRIL 20 MEET IN SACRAMENTO

**Northern Calif. A. G. C. Will  
Hold Sessions With  
Officials**

Public officials will be guests of Northern California Chapter, Associated General Contractors of America, at a general "get-together" meeting to be held in Sacramento Friday evening, April 30. Secretary-Manager Floyd O. Booe announced yesterday.

Members and associate members of the chapter will gather to hear details of current and forthcoming public works programs, and to talk with officials in charge of these programs, Mr. Booe said.

### Banquet Scheduled

Detailed plans for the meetings are expected to be announced following a meeting of the chapter's directors next Tuesday, at which time speakers, entertainment and other features of the meeting will be determined.

The sessions, Mr. Booe said, will center around a banquet to be held Friday night in the Empire Room of the Hotel Senator.

## STATE INVITES BIDS FOR SPAN AT RED BLUFF

**Proposals Open May 5; Bids  
Also Scheduled for  
L. A. Paving**

SACRAMENTO, April 13.—Two contracts were authorized for advertising today by the State Division of Highways here, with bids scheduled to open in Sacramento and Los Angeles during the first week in May.

Opening in Sacramento May 5 will be proposals for constructing a plate girder bridge with concrete deck across the Sacramento river at Red Bluff, Tehama county.

The following day in Los Angeles the state highway engineer will receive bids for grading and paving about four miles in Los Angeles county.

The Red Bluff bridge will consist of two 143-foot spans, one 126-foot span, two 108-foot spans and two 96-foot spans, according to specifications made available to contractors today.

### Concrete Piers

Spans will be supported on concrete piers and abutments with steel pile foundations.

Principal bidding items include 1,022,000 pounds structural steel; 390,000 pounds bar reinforcing steel; 950 cubic yards of concrete footing blocks; 1700 cubic yards concrete piers; 1810 cubic yards concrete abutments and superstructure; 17,570 feet of steel piles including steel piles; removing an existing steel truss span; and others.

The contract for which the highway engineer will open bids in Los Angeles May 6 calls for grading, paving with Portland cement concrete and plant-mixed surfacing on about four miles of Carson street between Lakewood boulevard and Norwalk road.

Stocks of distillate oil burner, at the end of February, 1937, amounted to 48,699 units, more than double the stock at the end of February, 1936, of 20,278, the Bureau of Census reports.

## Atlas Air Conditioning Gas Furnaces for Warm Air Heating

The low cost of oil in many localities, together with its ease of handling and many other advantages, make it an ideal fuel for use in heating and general air conditioning. To give residents and building owners in such localities the full benefits of these advantages, ATLAS has designed an improved mod in type of air conditioning unit. It consists of an ATLAS Oil-Burning Furnace of high efficiency, an ATLAS Blower Fan of the latest centrifugal, multi-vane type for air conditioning use, and provision for Air Filter, Humidistat, Automatic Controls, etc., as desired. This combination of ATLAS equipment is the very last word in modern year-around comfort and health protection. It ventilates in summer, warms in winter; provides a constant supply of pure, fresh, filtered air the year around; and forces the circulation of this air, rapidly, positively, and evenly to every part of the house. ATLAS Automatic Controls eliminate all work and bother; operation is quiet, unobtrusive, and results are ABSOLUTELY DEPENDABLE. ATLAS 28 years of leadership and thousands of satisfied customers assure that Buy an ATLAS and be SURE of these benefits—at an actual money saving.

## McKEE AWARDED GENERAL CONTRACT FOR LOS ANGELES UNION TERMINAL

LOS ANGELES, April 22.—Contract for construction of the main station buildings for this city's \$3,000,000 Union Passenger Terminal was awarded today to Robert E. McKee, 108 West Sixth street, Los Angeles. Amount of the contract price was not made public.

Separate contracts will be let at a later date for electrical and mechanical work, it was announced.

Contract for driving about 900 concrete piles for the station buildings was awarded earlier this month to Raymond Concrete Pipe Company of Los Angeles.

### Cost Guarantees

Bids received for the station buildings, opened April 1, had been held under advisement by terminal officials, who last week asked the ten general contractors who figured the work to submit guarantees of their costs.

The big terminal will be located on Alameda street between Aliso and Macy streets. It will be operated by the Los Angeles Union Passenger Terminal for Union Pacific, Southern Pacific and Atchafson, Topeka & Santa Fe railroads.

The general contract calls for construction of the passenger terminal buildings, offices, administration unit, main concourse, entrance lobby, dining room, kitchen, main waiting room and concrete tower.

### Train Concourse

In addition to these structures, a train concourse and baggage and express building will be situated at the rear.

The group will have a frontage of 860 feet on Alameda street and a depth of 290 feet. The main floor area will total approximately 120,000 square feet.

Excavation for the main group has been completed, and a large portion of the work on the train concourse and baggage and express buildings is underway. Bids for interior work in the express building will be called later by the Railway Express Agency, 85 Second street, San Francisco.

## BOILER PRODUCTION UP

Production of galvanized range boilers for the first two months of 1937 was 296,532 units, a substantial increase over the total of 131,067 units for the same period in 1936, nineteen manufacturers reported to the Bureau of Census.

## BIDS MAY 13 FOR NEVADA GRADING JOB

Bureau Advertises Combined  
Sections of Owyhee  
River Highway

Bids for the grading of Sections A and B, Route 18 of the Owyhee River National Forest Highway in Elko County, Nevada, the only Nevada road construction job listed for the fiscal year 1937-38 in the National Forest Highway program were called for May 13 by District Engineer C. H. Sweetser of the Bureau of Public Roads yesterday. The job consists of 7,554 miles of grading.

Last month Sweetser called for bids, to be opened March 16, for grading Section A of the project, a distance of 3.48 miles. The bid call was cancelled a week previous to the opening date when it was learned that funds had been allocated for grading Section B running southward for Section A.

Section B was listed in the National Forest Highway program for 1937-37 as a \$140,000 project. The length of the section is approximately 4.07 miles.

### Projects Combined

It was announced at the time of the postponement that the two projects would be combined and that bids would be called as soon as weather conditions permitted inspection of the site.

Principal items in the specification for the 7,554 mile grading job are: 227,700 cubic yards of unclassified excavation; 2,420 cubic yards unclassified excavation for structures; 5,650 pounds reinforcing steel; 3,142 linear feet CGS metal pipe, and 2,700 cubic yards unclassified excavation for borrow.

Plans and specifications may be obtained from the office of District Engineer C. H. Sweetser in the Federal Office building, San Francisco, upon deposit of \$10.

The per cent of capacity operated by 117 plants in the malleable iron casting industry during February, 1937, was 72 per cent, compared with 49.9 per cent for the same months in 1936 and 1935, the Bureau of Census reports.

## OAKLAND FIRM WINS EASTBAY WAREHOUSE JOB

H. J. Christiansen Co. Awarded \$143,980 Catucci Contract

H. J. Christiansen Co. 1955 Webster street, Oakland, will construct the warehouse in Emeryville which J. Catucci will lease to the Bigelow-Sanford Carpet Company of New York, it was announced yesterday.

The general contract price was given as \$143,980.

According to Architect Will G. Corlett of Oakland, who prepared plans for the structure, the general contract was awarded excluding heating and electrical work. Bids for this portion of the job will be taken at a later date, he said.

### Powell at Bayshore

The warehouse, one of the larger Eastbay private projects of recent months, will be located at the intersection of Powell street and Bayshore highway in Emeryville.

The structure will be two stories in height, of reinforced concrete construction, and will cover an area 200 by 200 feet in size. In addition to warehouse facilities, it will provide a service plant for the carpet company.

(Complete reports on the project have appeared in Daily Pacific Builder's Advance Report section.)

Shipments of fire motor apparatus for the first two months of 1937 amounted to 108 units as compared with 80 units for the same period in 1936, and 52 units for the first two months of 1935, he Bureau of Census reports.

## EXPECT RECORD ATTENDANCE AT A.G.C. MEETING

State, Federal Officials Among Speakers Scheduled for April 30 Conclave

Between 300 and 400 contractors, legislators and state and federal officials are expected to attend the banquet meeting to be held Friday evening, April 30, in Sacramento under auspices of the Northern California Chapter, Associated General Contractors, according to Secretary-Manager F. O. Booe.

Many already have made reservations for the banquet, Mr. Booe said yesterday, adding that all indications are that the meeting will draw a capacity crowd to the Hotel Senator.

An incomplete list of speakers includes:

Chief Engineer C. H. Purcell of the State Division of Highways, who will outline details of the state highway construction program for the next biennium.

Construction Engineer Walker Young of the U. S. Bureau of Reclamation, who will discuss the present status of the Central Valley Project and immediate construction projects.

State Engineer Edw. M. Hyatt, water authority and California's representative on the Water Resources Committee of the National Resources Committee, recently returned from Washington, Mr. Hyatt is expected to tell of recent developments in the national capitol with regard to western construction projects.

Senator John B. McColl, who probably will discuss the Central Valley Project developments.

### Legislative Report

Invitations also have been extended to several other speakers, whose acceptances have not yet been received, Mr. Booe said.

A brief report on legislative matters affecting the construction industry will be made by Mr. Booe as secretary-manager of the A. G. C. chapter.

The dinner will be followed by an entertainment program which Mr. Booe said will be of an unusual nature. Contractors planning to attend the meeting are urged to make their reservations as soon as possible.

## FOUR FANS ADDED TO SEABREEZE LINE

The Emerson Electric Mfg. Co., St. Louis, announces the addition of four new Seabreeze fans to their 1937 line. The additions are: a new two-speed 12-inch oscillator; a 10-inch oscillator with an adjustable floor stand; and a 12-inch ventilator in mounting panel or wall box. The complete line in addition to the above includes: an 8- and 10-in. non-oscillator, 10-in. oscillator, and 10-in. ventilator in mounting panel or wall box.

## MATERIAL PRICE GAIN CONTINUES

Continuing the gains which have marked recent weeks, the wholesale price index for building materials, as reported by the U. S. Bureau of Labor Statistics, advanced 0.2 per cent during the week ended April 10 to reach 95.8 per cent of the 1925 level. Average prices of brick and tile, gravel and sand were higher, according to the bureau survey. Lumber and paint materials declined slightly, while cement and structural steel remained firm.

Metals and metal products showed exactly the same gain as building materials, the bureau report said, crediting the rise to higher prices for certain iron and steel items and copper and brass manufacturers.

## State Advertiser's Ventura Grading

SACRAMENTO, April 20.—Bids for grading and surfacing about 2.2 miles in Ventura county were invited today by the State Division of Highways. They will be opened by the State Highway Engineer in Los Angeles May 13.

Surfacing will be asphalt concrete and plant-mix. The project is located between Pyle road and Telegraph road.

## OFFICERS ELECTED BY PORTLAND A. G. C.

Matt J. Lynch was re-elected president of Portland chapter, Associated General Contractors of America, at the organization's annual meeting held in the Multnomah hotel, Portland, last week.

Other officers chosen by the chapter to serve for the coming year, include Harry A. Dick, first vice-president; Theodore Shoemaker, second vice-president; Nat McDougall, treasurer, and Miss Belle Dennis, secretary. Miss Dennis is also office manager for the chapter.

Orders for malleable iron castings taken during February, 1937, amounted to 60,187 short tons, compared with 54,070 for the same month last year, according to the monthly report of the Bureau of Census.

## METHODS LISTED FOR PREVENTION OF EXPLOSIONS

U. S. Bureau Expert Makes Nine Recommendations in Blast Probe

As a result of an investigation of the New London, Texas, school explosion which last month took the lives of more than 400 children, Dr. David J. Price, explosion expert of the U. S. Bureau of Chemistry and Soils, has listed in his formal report forwarded by Secretary of Agriculture Henry A. Wallace to Governor James V. Allred of Texas what he considers the nine most important recommendations for the prevention of similar explosions.

Dr. Price recommends:

(1) Use of effective malodorants for detection of escaping combustible gases; (2) development of methods for application of combustible gas indicators; (3) supervision and inspection of public buildings and institutions; (4) installation of approved pressure regulating devices; (5) installation of all electrical equipment and appliances in accordance with requirements of National Electrical Code; (6) proper construction to eliminate dead spaces underneath occupied rooms; (7) location of main gas lines outside of public buildings and not underneath the building proper; (8) ventilation of necessary open spaces, and (9) ventilation of school rooms where gas heating appliances are installed.

It has not been possible in the investigation to establish definitely the source of the gas accumulation. It may have come from improper connections causing leaks in the lines, or from nearby wells, or it may have been from seepage through the surrounding strata, evidence is definite and conclusive, however, that the explosion originated in the manual training shops and spread through the unoccupied space under the first floor.

## G-E ORDERS UP 78% OVER '36 QUARTER

Orders received by the General Electric Company for the first quarter of 1937 amounted to \$105,747,030, compared with \$59,569,879 for the corresponding quarter of 1936, an increase of 78 per cent, President Gerard Swope announced this week. This was the largest first quarter in the history of the company. A statement of net sales billed and earnings for the first quarter will accompany the dividend of 40 cents a share, payable to stockholders on April 26, 1937.

The value of shipments of deep well water systems for February, 1937, was \$182,342, nearly three times the value of February, 1936 shipments of \$63,083, the Bureau of Census reports.

## 21— BRIDGES

### PLANS BEING PREPARED

**LOS ANGELES.**—The Union Pacific Railway, Pacific Electric Bldg., is preparing plans for a bridge to carry its tracks over the Los Angeles River near the site of the new union station. The proposed bridge will be of steel construction supported by reinforced concrete foundation, piers and abutments. The latter will probably be done by contract while the railroad company will probably build the steel superstructure. The present plans of the U. S. War Department propose a 220-ft. channel for the river at this point, but on account of the several spans required in the U. P. Railway bridge it is thought that the channel will be widened to the full 300 feet.

### CONTRACT AWARDED

**SAN DIEGO COUNTY, Calif.**—B. G. Carroll, 4396 Maryland Street, San Diego, at \$47,763 awarded contract by the State Division of Highways, C. H. Purcell, State Highway Engineer, Sacramento, for the construction of a reinforced concrete girder crossing over the tracks of the Atchison, Topeka & Santa Fe Railway, near San Onofre, consisting of one 75-ft. span, two 53-ft. spans and two 30-ft. 8-in. spans on concrete bents and abutments with wing walls.

### BIDS WANTED

**GOVERNMENT ISLAND.**—Until April 27, 2 p.m., bids will be received by Frank Haynie, Supply Officer, Forest Service Supply Depot, Government Island, Oakland, under Bid No. 4630, for furnishing one 180-ft. continuous beam span, including all structural steel, bolts for field connections, etc., for the Mill Creek Bridge.

Delivery f.o.b. bidder's shipping point and/or Piedra.  
Specifications obtainable from the above office.

## 22— DREDGING HARBOR WORKS, EXCAVATION

### BIDS WANTED

**SEWARD, Alaska.**—Until June 1, 3 P. M., bids will be received by the U. S. Engineer Office, 754 Central Bldg., Seattle, for the construction of a rock mound breakwater at Harbor of Refuge, Seward.  
Plans and specifications obtainable from the above office.

### PLANNED

**MARE ISLAND.**—Preliminary plans and specifications for construction of a graving dock at Mare Is-

land have been completed and are now in the office of the Public Works Officer, Mare Island, for final revisions. The Navy Department hopes to call for bids on the work by July 1. Estimated cost, \$3,500,000.

The dock, of reinforced concrete construction on pile foundations, will be located south of Cradle No. 2 at Mare Island, and will be 700 ft. long, 134 ft. wide, and 40 ft. over sill in depth. It will be of the cruiser type, capable of docking ships of the 10,000-ton cruiser class.

### BIDS WANTED

**SAN DIEGO.**—Until April 29, 11 a.m., bids will be received by the Public Works Officer, Headquarters, 11th Naval District, foot of Broadway, San Diego, under Spec. No. 8461, for driving foundation piles for temporary officers' mess at the Naval Operating Base (Marine Corps Base), San Diego.

The work consists of the furnishing of all equipment, labor and driving 69 untreated timber foundation piles, each 30 feet long. The Government will furnish the piles and will do such excavating work as may be required for advance preparation for driving the piles.

Plans and specifications obtainable from the above office upon deposit of \$10.

### CONTRACT AWARDED

**NAPA RIVER.**—Franks Contracting Co., 260 California St., San Francisco, at \$9,358 per c.y., total \$61,265, awarded contract by the U. S. Engineer Office, Lieut.-Col. J. A. ### 30—RESERVOIRS & DAMS

#### CONTRACT AWARDED

**SUN RIVER PROJECT, Montana.**—McLaughlin Constr. Co., Livingston, Montana, at \$53,275, awarded contract by the Bureau of Reclamation, Fairfield, W. Walker, Superintendent, under Spec. No. 725, for the construction of alterations to the spillway at the Gibson Dam, Sun River Project, about 23 miles northwest of Augusta.

The work involved will consist of altering the existing crest of the spillway, placing a new concrete crest and the installation of six radial gates, each 34 ft. wide by 12 ft. high. The work must begin in 30 days and be completed in 270 calendar days.

#### FUNDS ALLOTTED

**TONGUE RIVER DAM, Montana.**—The PWA has allotted a loan of \$660,000 and a grant of \$540,000 to the Montana State Water Conservation Board for construction of an earth-fill dam on Tongue River Reclamation Project, about 12 miles inside Montana line to provide supplemental water supply for present irrigable land.

The dam, which will be 115 feet high, is designed to impound 75,000 acre feet. Construction cost is estimated at \$842,000.

The work will involve:

- Tongue River Dam:**
- (1) 850,000 cu. yd. earthfill;
  - (2) 240,000 cu. yd. rock fill, small rock;
  - (3) 12,000 cu. yd. spillway excavation, earth and rock;
  - (4) 2,400 cu. yd. concrete, in spillway.
- Tower-Tunnel & Portals:**
- (5) 10,000 cu. yd. rock excavation;
  - (6) 5,000 cu. yd. earth excavation;
  - (7) 1,830 cu. yd. concrete lining in tunnel;
  - (8) 600 cu. yd. concrete lining in portals;
  - (9) Blanket coal seams;
  - (10) 15,000 cu. yd. excavation;
  - (11) 18,000 cu. yd. backfill.

### 32—SEWERS & SEWAGE DISPOSAL PLANTS

#### BONDS VOTED

**HEALDSBURG Sonoma Co., Cal.**—A proposal to issue \$35,000 in bonds, to finance construction of a modern principal sewage pumping plant and treatment works carried at a special election April 20 by a vote of 329 to 43.

Harry N. Jenks, 2701 Revenue, Berkeley, consulting engineer.

#### PLANNED

**ORANGE COUNTY, Calif.**—Seven cities of the eight constituting the Joint Outfall Sewer Dist. of Orange County favor the construction of individual treatment and reclamation plants rather than reconstruction of the joint outfall. Santa Ana alone is supporting the reconstruction work. Fullerton has procured an estimate of the cost of constructing such a plant as compared with the repair of the old line. The new work will cost \$100,000 as against \$121,579, basing the estimate upon a capacity of 2,000,000 gallons. Orange is also considering a treatment plant. E. P. Haggood, city engineer of Anaheim, reports that Anaheim is also making studies of the reclamation method of disposal. Santa Ana has received from S. Kennedy, consulting engineer, 74 New Montgomery St., San Francisco, an estimate of \$37,660 for reconstruction of the line, the cost to be divided among eight cities according to the capacity required by the various cities.

## BUREAU SEEKS PROPOSALS ON SHASTA WORK

**Bids May 18 on 16-Mi. Armor Coat Project; \$115,000 Programmed**

The first of two Shasta National Forest highway contracts for which \$365,000 has been allotted in the forest road program for the fiscal year 1938 was authorized for advertising yesterday by District Engineer C. H. Sweetser of the U. S. Bureau of Public Roads.

Bids on the contract, for armor coat surface treatment of 16.16 miles of the Mt. Shasta-Mt. Lassen National Forest highway, will be opened at the Bureau's San Francisco office May 18.

The bureau has budgeted \$115,000 for the project, which involves placing surface course and bituminous treatment on Sections D and E of the highway, Route 77. Work is located in Siskiyou and Shasta counties.

### Top Course

Principal items include 45,000 tons crusher run top course; 1,125,000 gallons watering; 3800 tons cover, and others.

Plans and specifications may be obtained by contractors desiring to figure the project upon application to the bureau office in San Francisco. A deposit of \$10 is required.

The remaining Shasta National Forest contract to be advertised in the 1938 program includes grading the remaining uncompleted section of the Mt. Shasta-Mt. Lassen highway, about five miles in length between Four Corners and Cayton. Work under this contract will include construction of a bridge over Lake Britton Narrows.

The grading project has been allotted \$250,000. The projects are two of ten California projects which have been allotted a total of \$1,166,000 in the program for the 1938 fiscal year.

## BOILER PRODUCTION UP

Production of galvanized range boilers for February, 1937, was 106,168 units, as compared with 107,345 for the same month in 1936, according to the monthly report of the Bureau of Census.

## STATE ADVERTISES COAST GRADING CONTRACT, UNDERPASS IN STOCKTON

SACRAMENTO, April 27.—Two major contracts for which nearly \$1,000,000 has been programmed, today were authorized for advertising by the State Highway Commission, with bids on both scheduled for opening May 19 in Sacramento.

Out for bids are a 3.3 mile grading and surfacing project in San Luis Obispo county, with approximately \$665,000 of 1936-37 highway funds budgeted for its construction; and the \$325,000 Wilson Way underpass in Stockton.

The San Luis Obispo county project is located between San Luis Obispo Creek and Cuesta Siding, and involves grading, surfacing with plant-mixed surfacing, medium curing type, on crusher run base.

### Sixty-Eight Items

Contractors will submit unit prices on 68 items, including alternative proposals for metal or reinforced concrete headers.

Major items include 915,000 cubic yards roadway excavation; 3,310,000 station yards overhaul, and numerous others.

The Stockton project involves construction of a steel and concrete undergrade crossing under the Atchison, Topeka & Santa Fe tracks at Wilson Way, and paving with Portland cement concrete and asphalt concrete about 0.29 of a mile.

Forty-four bidding items will be figured by contractors, including 33,000 cubic yards of unclassified roadway excavation; 10,000 cubic yards structure excavation; 352,000 pounds structural steel; 3,250 cubic yards Class A Portland cement concrete in structures, and numerous others.

## FIRST HIGH SPEED LIFTS FOR ITALY

The first high speed gearless elevator equipment for Italy will be installed in the fifteen-story office building of the Monacatini Company, a chemical concern located in Milan. The order covering equipment for twenty elevators has been received by the Westinghouse Elevator Company, according to an announcement of Frank Reed, president.

## LICENSE BOARD OPENS OAKLAND BRANCH OFFICE

**Takes Quarters on 15th Street; Inspector Examination Date Set**

For the convenience of Alameda county contractors, the State Contractors' License Board announces the opening of a branch office in the Dalziel building, on Fifteenth street between Clay and Washington streets in Oakland.

The office will be a clearing house for contractors' business, though no one will be appointed to remain there throughout the day, according to officials.

Arrangements have been made to handle telephone calls, however. The telephone number is Glencourt 1200. It is planned to have one or more inspectors at the office between 3 and 5 P. M. Inspectors in the district are Leonard Ford and August Rahlves.

Coincident with the announcement of the new office, the State Personnel Board set the date for a civil service examination for the position of inspector with the State Contractors' License Board.

Last week the old eligible list was cancelled and the examination is for the purpose of providing a new list. The examination will be held May 15. Applications must be filed with the State Personnel Board before midnight, May 8.

Shipments of galvanized range boilers for February, 1937, amounted to 107,345 units, as compared with 62,300 units shipped during the same month in 1936, the Bureau of Census reports.

YERBA BUENA ISLAND—PIPE LINE & PUMP STATION—(Govt.)

YERBA BUENA ISLAND.—Herman Lawson Co., 465 Fier W-1, at \$113,033.80, submitted low bid for the U. S. Engineer Office, Lieut.-Col. J. A. Dorst, Dist. Engr., Custom House, San Francisco, under Bid No. 868-37-242 for the construction of a pump station and pipe line to transport water from Pier W-1 of the San Francisco-Oakland Bay Bridge at Spear St., in San Francisco, to within 140 ft. of a proposed reservoir site on Yerba Buena Island, a total distance of 11,750 feet.

Work consists of constructing a pump station at Pier W-1 of the San Francisco-Oakland Bay Bridge, and a pipe line from the easterly curb of Spear St., in San Francisco, through the pump station, across San Francisco-Oakland Bay Bridge, to within 140 ft. of the proposed reservoir site on Yerba Buena Island.

The work involves:

- (1) 50 c.y. structure excavation for pump station;
- (2a) 102 c.y. concrete, Class A;
- (2b) 9 c.y. concrete, Class B;
- (3) 16,000 lbs. reinforcing steel;
- (4) lump sum, completing concrete structures;
- (5a) 2 each, 175-gpm pump and motor;
- (5b) one 1250-gpm pump and motor;
- (5c) one 1750-gpm pump and motor;

- (6) lump sum, electric control and wiring equipment;
- (7) lump sum, telemetering equipment;
- (8) lump sum, pipe and fittings in pump station;
- (9) lump sum, surge chambers;
- (10a) 240 l.f. 8-in. seamless galvanized steel pipe and fittings;
- (10b) 1,000 l.f. 10-in. seamless galvanized steel pipe and fittings;
- (10c) 9,261 l.f. 10-in. galvanized steel pipe and fittings;
- (10c-Alt.) 9,261 l.f. 10-in. cement lined steel pipe and fittings;
- (11a) 24 each, 8-in. rotating spherical joints;
- (11b) one 8-in. do (furnishing only);
- (12a) 14 each, 10-in. expansion joint double type, 4-in. travel;
- (12b) one 10-in. expansion joint, single type, 1-in. travel;
- (13) 5 each, 10-in. gate valves;
- (14) 31,000 lbs. structural steel;
- (15) 265 each, pipe roller assemblies and small valves on pipe line;
- (17) 17 each, fire hydrant assemblies
- (18) 3 each, drinking fountains (installing only);
- (19) lump sum, painting pipe, fittings and structural steel;

## S. F. FIRM LOW ON VACAVILLE, RENO PROJECTS

**K. E. Parker Co. Submits the Lowest Figures for Hospital, Post Office**

WASHINGTON, D. C.—K. E. Parker Co., 135 South Park, San Francisco, today submitted low bids aggregating approximately \$272,700 on two federal building contracts, for which proposals were received here.

To the Veterans' Administration, Parker sent a low figure of \$204,970 for construction of Hospital Building No. 1 at the Reno, Nevada, veterans' facility.

To the Treasury Department Parker submitted a \$67,760 low bid for constructing the U. S. post office in Vacaville, Calif.

On the Reno hospital building Schuler & McDonald of Oakland, were second low bidders at \$210,740; with Trewhitt, Shields and Fisher of Fresno, submitting the third low figure at \$214,000.

### Elevator Contract

Otis Elevator Company at \$7,487 was low bidder for elevators in the hospital, with L. F. Dow Co. second low at \$7,900.

The hospital will be a two-story and basement reinforced concrete structure.

Second low bidder for the Vacaville Post Office was the Lundberg-Richter Co. of Virginia, with a proposal of \$68,000.

A. Nelson, Inc., San Francisco, submitted the third low figure for the post office contract. Amount of Nelson's bid was \$71,989.

## TERRAZZO, MOSAIC RESEARCH EXPANDS

The research program of the National Terrazzo and Mosaic Association has recently been extended. The new work is to be carried out by Foster D. Snell, Inc., consulting chemists and chemical engineers. Their Baltimore laboratory will be used for the purpose to permit closer cooperation with the Washington office of the Association, but the work will be under the supervision of the Brooklyn laboratory.

## BIDS MAY 26 ON SIX HIGHWAY JOBS; TWO MAJOR CONTRACTS ON SCHEDULE

SACRAMENTO, May 4.—Bids on six Northern California highway contracts—the largest schedule in recent months—were invited today by the State Highway Commission here. Proposals on all six projects will be opened in Sacramento May 26.

Included in the group are two major grading contracts, first of the projects programmed for the 1937-39 biennium.

More than \$500,000 has been budgeted for the jobs authorized for advertising today.

Contracts on which the commission invited bids are located by counties as follows:

### Siskiyou Grading

Siskiyou: grading about 20.3 mi. between Cougar and Macdoel, including 131,700 cubic yards of unclassified roadway excavation on one section and 82,800 cubic yards roadway excavation at another location; 300,000 station yards overhaul; 75,000 cubic yards imported borrow, and other items.

Modoc: grading and surfacing with plant-mixed surfacing about 10.1 miles between 1.4 miles west of Hot Creek and Alturas. Major items include 136,800 cubic yards roadway excavation; 421,500 station yards overhaul; 68,200 cubic yards of imported borrow; 17,000 tons mineral aggregate; and others.

Tuolumne: six and two-tenths miles surfacing with untreated crushed gravel or stone base and road-mix surfacing, between Stoddard Springs and McCoy Saddle.

### Seal Coat

Plumas: applying seal coat on about 20 miles between Howells and a quarter-mile south of Keddie.

Tehama: about 3.8 miles surfacing with road-mix and applying seal coat, between Morgan Springs and Route 86.

Kings: about 8.6 miles surfacing with plant-mix surfacing and constructing borders, between Kings River Slough and Hall's Corner.

Shipments of shallow well water systems totalled 13,290 units during February, 1937, more than double the total of 5,962 shipped during February, 1936, according to the monthly report of the Bureau of Census.

## BID DATE SET ON FRANCISCAN FATHERS' HOME

**Selected List of Contractors Figuring On \$100,000 Residence**

Bids for construction of a residence to be constructed in Oakland for the Franciscan Fathers will close May 18, it was announced yesterday. They are being taken from a selected list of contractors.

The residence will cost in the neighborhood of \$100,000, it is estimated.

It will be a two-story reinforced concrete structure with a garage. In addition to work rooms, store-rooms, kitchen, parlors and offices, the residence will contain 40 bedrooms.

### Donovan Architect

Plans for the building, which will be erected at 1500 Thirty-fourth avenue in Oakland, were prepared by Architect John J. Donovan of Berkeley.

Among contractors who will submit bids are the following:

Miller Construction Co., 3917 Mission St., San Francisco; James L. McLaughlin Co., 251 Kearny street, San Francisco; Dinwiddie Construction Co., 210 Crocker Bldg., San Francisco; K. E. Parker Co., 135 South Park, San Francisco.

Anderson & Ringrose, 320 Market street, San Francisco; N. H. Sjoberg, 5004 East Sixteenth St., Oakland; Schuler and McDonald, 1719 Sixteenth street, Oakland, and Lindgren & Swinerton, 1723 Webster street, Oakland.

### BIDS JUNE 18 ON SUSANVILLE P. O.

WASHINGTON, D. C., May 6. — Bids for construction of the U. S. Post Office at Susanville, Calif., will be opened hereby the Treasury Department June 18, it was announced today. The structure has been allotted \$70,000 from current federal building funds. Plans were prepared in the office of the Treasury Department supervising architect. Award of a \$60,700 contract to Lundberg-Richter Co., Fredricksburg, Va., for construction of the post office at Lovelock, Nev., was announced today by Treasury Department officials.

## PLAN \$283,000 PETALUMA BOND VOTE IN JUNE

### Disposal Plant Acquisition, Erection of Firehouse Are Proposed

An ordinance providing for the submission of three bond issue proposals, aggregating \$283,000, to the electorate at a municipal election, June 8, was adopted this week by the Petaluma City Council.

The measures involve proposed acquisition of a sewer and sewage disposal plant system at a cost of \$225,000; construction of a \$40,000 fire house on city property at D and Second streets; and purchase of additional fire fighting equipment at a cost of \$18,000.

Preliminary survey work on the sewer system was done by Harry N. Jenks, Berkeley consulting engineer.

At the meeting Jenks offered to enter into a contract with the city to handle engineering and construction details of the sewer disposal system, the contract not to be effective should the bond proposition be defeated at the polls.

next meeting of the body.

The council instructed City Attorney Karl Brooks to draw up a contract to be submitted at the

### KERN RIVER MAPS ISSUED BY SURVEY

A three-color topographic map showing the plan and profile of the Kern River, Calif., from a point eight miles above Bakersfield to Mile 53, South Fork to Mile 13, and miscellaneous dam sites, has been published by the U. S. Geological Survey. There are seven sheets of maps, including three plan and two profile sheets, showing the following dam sites: 1. The proposed dam from the U. S. Geological Survey, near D. #### Cuesta Grade

Largest remaining contract in the current program is the Cuesta Grade project in San Luis Obispo county, for which bids will be opened May 19.

Among six projects authorized for advertising yesterday by the Division of Highways are three in the new program for which more than \$500,000 has been budgeted. Indications were that June will see a large number of contracts let.

### LINDE TO EXHIBIT AT FOUNDRY SHOW

The Linde Air Products Company, unit of Union Carbide and Carbon Corporation, will exhibit at the forthcoming American Foundrymen's Association exhibit at Milwaukee, Wis., May 3 to 7, 1937, together with its associate organization, Electro Metallurgical Company.

Featuring the Linde display will be demonstrations of machine cutting and hand cutting by the oxy-acetylene process. The use of the oxygen lance, the technique of cutting high-chromium steels and heavy cutting of carbon steels will be shown. In addition, acetylene generators and representative Ox-weld, Prest-O-Weld, and Purox welding and cutting equipment will be demonstrated.

### BURNER SHIPMENTS UP

Shipments of oil burners for the first two months of 1937 totalled 19,192, a substantial increase over shipments totaling 15,056 for the same period in 1936, and more than double the two-month shipments for 1935 of 9,016 burners, the Bureau of Census reports.

## 16 ARCHITECTS ARE REGISTERED BY STATE BOARD

### Eleventh Woman Architect in District Is Granted Certificate

Sixteen Northern California architects were granted final certificates authorizing them to practice architecture at a recent meeting of the State Board of Architectural Examiners.

Included in the group is Miss Elizabeth Boyter, who becomes the eleventh registered woman architect in the Northern California district.

Those granted certificates included Wimmial F. Baxter, Curtis Tobey, Malcolm D. Reynolds, William Allen, Curtis C. Maybach, Arthur B. Gallion, Ralph N. Pollock.

Alfred C. Williams, William Arthur Newman, John Henry Devitt, Clarence C. Maybach, Frank Wynkoop, Ernest K. Duckering, Charles St. G. Pope and William Diest.

#### First Since 1929

Miss Boyter is the first woman to receive a certificate in Northern California since 1929, when Miss Rose Luis of Oakland was granted a certificate.

A graduate of the University of California, Miss Boyter received her architectural training in the offices of Julia Morgan and Smith O'Brien. At present she is associated with the office of Engineer Leland S. Rosener in San Francisco.

### NEVADA LICENSE STILL REQUIRED

Although the Nevada legislature has repealed that state's public works contractors' license law, the repeal does not become effective until July 1 and until that date contractors bidding on highway and other state contracts will be required to pay the license fee.

This was revealed yesterday in a special message from Secretary Manager Floyd O. Booe to members of Northern California Chapter, Associated General Contractors, warning them to procure licenses if they plan to figure Nevada public works jobs before the license act repeal becomes effective.

## APRIL PERMITS \$1,972,000 IN SAN FRANCISCO

### Building Maintains Volume of Previous Month; Frame Gain Continues

Aided by a substantial increase in frame construction the San Francisco building permit total for April reached \$1,972,372, falling approximate \$100,000 short of the record March figure, according to Chief Clerk S. J. Rosenblum of the Central Permit Bureau.

The total number of permits issued was 913, the highest figure in more than a decade. Thirty-four more permits were issued in April than in March. In that month 879 were issued, the highest number to be issued in a single month since May, 1927.

For the second time this year frame construction topped the million dollar mark. In all, 266 permits were issued for frame buildings valued at \$1,137,190. This was the highest single month frame total since the pre-depression days of May, 1929, when the total for frame permits reached \$1,168,718.

#### Frames Gain

The April frame total showed an increase over the March figure of \$42,512.

A tabulation of frame construction building permit totals for the first four months of 1937 produced a total of \$3,501,294. Frame figures for the first three months of the year were January, \$563,126; February, \$716,300, March, \$1,084,678.

Largest permit of the month was issued for the Santa Fe Bus Terminal at Fourth street and Pioneer place. The building, estimated to cost \$260,000 on the building permit, will be a two-story and basement steel and concrete structure. P. J. Walker Co. has been awarded the contract for the building which was designed by Architect H. L. Gilman, and Engineer M. C. Blanchard.

The issuance of the \$260,000 permit April 6, boosted the day's total to \$473,815, one of the largest days in several years.

#### Four-Month Total

"The high total for April is particularly gratifying to the building industry," Rosenblum said Friday. "The entire total, with the exception of one \$18,000 permit, resulted from private construction."

#### Figures Classified

Following is a classification of permit figures for April, 1937, and April, 1936:

Class.	No.	April, 1937		April, 1936	
		Est. Cost	No.	Est. Cost	No.

## BUREAU SEEKS TUOLUMNE GRADING, SAN DIEGO SURFACING PROPOSALS

Bids on two California forest highway projects for which more than \$150,000 has been programmed were invited yesterday by District Engineer C. H. Sweetser of the U. S. Bureau of Public Roads. Proposals for one contract will be opened May 28 and the other June 1.

Both openings will be held in the bureau's San Francisco office. Largest of the two contracts is for grading about one and eight-

tenths miles and constructing a reinforced concrete bridge in Tuolumne county. The project is located between Pinehurst and Strawberry, Section D of Route 38, the Sonora Pass National Forest Highway, Stanislaus National Forest.

Allotted \$120,000. Listed in the new forest highway program for California, the project has been allotted approximately \$120,000. Bids on this contract will be opened here June 1.

Major bidding items include thirteen and one-half acres of clearing and grubbing; 67,200 cubic yards unclassified excavation; 7950 cubic yards excavation for borrow; 161,600 station yards overhaul; 1.73 miles finishing earth graded road; 701.5 cubic yards concrete; 126,350 pounds reinforcing steel, and 1302 feet of corrugated galvanized metal pipe.

The other contract authorized for advertising yesterday by the bureau calls for placing a road-mix surface course on 14.3 miles in San Diego county, on Sections C, D and E of Route 73, the Laguna National Forest Highway, Cleveland National Forest.

Bids on the San Diego county contract will be opened in San Francisco May 28.

#### Road-Mix Surfacing

The project is located between Cuyamaca Lake and the Laguna recreational area. Work will involve placing 14.3 miles of Type C-1 road-mix surfacing; 1650 tons cutback asphalt; 200,000 gallons watering; 7000 cubic yards Class C new aggregate of disintegrated granite.

The San Diego project has been allocated \$30,000 from the current forest highway program, to supplement funds previously allotted for the work.

The two projects placed on the market yesterday are among a group of ten in California which received in the current program, allotments aggregating approximately \$1,166,000.

## BERGER MFG. CO. IN NEW QUARTERS

The Berger Manufacturing Co., division of Republic Steel Corp., has moved to new and larger quarters at 841 Howard street, between Fourth and Fifth streets in San Francisco.

Increased business, said officials of the firm, necessitated the move. Improved parking facilities are offered by the change, they declared. The telephone number remains unchanged, EXbrook 3197.

The firm manufactures lockers, shelving and special built equipment.

## SPAN APPROACH, SIDEWALK WORK NEARING FINISH

### Stripping Forms from Pylons; Electrolier Contract Is Underway

With all construction on the Golden Gate Bridge in the final stages of completion, extensive preparations were under way this week to get the operations scheduled under way.

Construction activities this week centered principally about paving operations, according to the progress report of Chief Engineer Jos. B. Strauss.

Sidewalks on the main structure were two-thirds complete at the beginning of the week's work, while the engineer reported that paving of the toll plaza was 90 per cent complete.

Paving on the roadway sections of the east approach through the Presidio was two-thirds complete and curbs were being laid along the north sides of these sections. The paving between the east end of the low viaduct and the Marina Gate likewise was two-thirds complete.

#### Start Paving Lateral

On the Sausalito lateral approach in Marin county paving was started last Wednesday and more than 2,000 feet of the roadway has been paved. This is roughly 25 per cent of the job.

Pylons on both sides of the Golden Gate have been completed and the contractor is engaged in stripping the forms and cleaning up. Erection of the portal enclosure plates around the top struts of each tower is continuing and the installation of the elevators in the towers is continuing.

The electrical contractor is following close behind the sidewalk crews on the main structure, installing the electroliers for sodium vapor lights that will illuminate the span and its approach structures.

Employment on the job this week totaled approximately 500 men on the several contracts and 250 on the Sausalito lateral and other projects, sponsored by the district. In addition there are 400 men working on the Lyon street outlet, a WPA project sponsored by the city of San Francisco.

## OPEN PROPOSALS ON EMERYVILLE PLANT ADDITION

Clinton Low at \$89,516; Ten Contractors Figure Project

Clinton Construction Co., 923 Folsom street, San Francisco, yesterday was the lowest of ten bidders for construction of an addition to the Emeryville plant of The Paraffine Companies, Inc. Amount of the low bid was \$89,516.

Lindgren & Swinerton, Inc., was a close second with a proposal of \$89,900.

Work includes construction of a 4-story reinforced concrete building 95 by 97 feet in size and a one-story steel frame building of corrugated iron and hollow tile construction, 115 by 60 feet in size, at the plant located at the foot of Powell street in Emeryville.

### Bids Listed

Complete bids for the work were as follows:

Clinton Constr. Co.	\$89,516
Lindgren & Swinerton, Inc.	89,900
MacDonald & Kahn, Ltd.	91,819
K. E. Parker Co.	92,900
Dimwiddle Constr. Co.	93,950
The Austin Company	94,470
Barrett & Hip.	97,128
John F. Tulloch	98,677
Jas. L. McLaughlin Co.	99,000
P. J. Walker Co.	105,842

Plans for the additions were prepared by Engineer Leland S. Rosener of San Francisco, in whose office bids were opened yesterday. All bids were referred to the owner for recommendation.

## Home Building Cost Gain Less than 10%

Residential building costs have increased less than 10 per cent during the past year in a majority of the cities in the United States, it was indicated in a study just completed by the statistical department of American Radiator Co.

Figures obtained through the Federal Home Loan Bank Board on the cost of an identical six-room house in various cities showed 56 cities in which costs were less than 10 per cent higher during the first three months of this year as compared with the first three months of last year and 11 cities in which the increase was more than that.

Statistics from the United States Bureau of Labor Statistics indicated that the cost per family of new one-family houses in 1936 was \$1,072.73 in 1935, an increase of 7.74 per cent.

Shipment of 100,000 electrical fire extinguishers, valued at \$1,000,000, was shipped over the shipper's facilities in March, 1936, the highest volume in reports.

## STATE GETS BIDS FOR L. A. PAVING

LOS ANGELES, May 6.—Sully-Miller Contracting Co., 1500 W. Seventh street, Long Beach, today submitted a low bid of \$96,909 to the office of the State Highway Engineer here for grading and paving about four miles in Los Angeles County, between Lakewood boulevard and Norwalk road, on Carson street. Second and third low bidders, respectively, were Oswald Bros. Los Angeles, at \$98,618; and Griffith Co., Los Angeles, at \$102,162.

The contract calls for paving with Portland cement concrete and plant-mixed surfacing.

## BIDS MAY 21 ON AQUEDUCT REPLACEMENT

S. F. Works Dept. Invites Proposals for Office Alterations

Two San Francisco municipal contracts were authorized for advertising yesterday—one by the Public Utilities Commission and one by the Department of Public Works—and bids on another were opened by the latter department.

The Utilities Commission set May 21 for opening proposals on replacement of a portion of Stone Dam Aqueduct in San Mateo Co.

The Department of Public Works called for bids, to be opened May 19, for alterations to the Controller's and Tax Collector's offices in the city hall. Cost of this work is estimated by City Architect Charles H. Sawyer at approximately \$12,000.

### Four Proposals

Four bids were received by Acting Director S. J. Hester of the Department of Public Works for constructing equipment for the Agassiz school. Lowest bidder was Grant Martinelli Construction Co., with a proposal of \$18,488.

Other bidders were DeLuca and Son, Inc., \$18,800; F. C. Amoroso & Sons, \$19,253; and Anderson & Ringrose, \$22,500.

The Stone Dam Aqueduct work involves removal of approximately 2,900 feet of an existing wooden flume and its replacement with the same length of 48-inch inside diameter reinforced concrete pipe.

### Connects With Tunnel

The section of the aqueduct to be replaced connects at its upstream end with an existing tunnel and at its downstream end with an existing 44-inch steel pipe inverted siphon. The upstream end is accessible by a private road and is located about five and one-half miles by road from Millbrae, San Mateo county.

Alternative items providing for either monolithic or centrifugally spun concrete pipe are included in

## 1,264,000-YARD LEVEE PROJECT IS ADVERTISED

U. S. Engineers to Open Bids May 28 on Yolo By-Pass Cache Creek Work

Bids for levee construction in the vicinity of Yolo By-Pass will be opened May 28, the U. S. Engineer Office in Sacramento announced yesterday.

Under the contract advertised for bids, a total of approximately 1,264,000 cubic yards of material is to be placed in levee embankments along Yolo By-Pass, Knights Landing Ridge Cut, Cache Creek Settling Basin and Cache Creek.

Work is divided into two sections in the bidding schedule, which includes a total of 42 items.

### Yolo By-Pass

Section 1, involving placing of about 937,300 cubic yards of material, includes work along 2.3 miles of the west levee of Yolo By-Pass southerly from Fremont Weir to the north levee of Knights Landing Ridge Cut; 0.75 of a mile along the north and south levees of Knights Landing Ridge Cut northwesterly from the west levee of the by-pass and about 2,200 ft. of spur levee; and 2.7 miles along the west levee of Yolo By-Pass from the south levee of Knights Landing Ridge Cut to the Sacramento-Northern Railroad.

Section 2 involves placing about 326,700 cubic yards of material in embankment. It covers work for about three miles along the Cache Creek Settling Basin from the west levee of Yolo By-Pass to the north levee of Cache Creek; and 1.2 miles along the south levee of Cache Creek and 1.8 miles along the west training levee of Cache Creek Settling Basin.

## PUBLISHED MERCURY LIGHTING CATALOG

A catalog describing many types of industrial lighting equipment for use with 200 and 400 watt high intensity mercury vapor lamps has been published by the Westinghouse Electric and Manufacturing Company. Combination mercury - incandescent units are also described. Included in the catalog is information on designing an installation, choosing mounting heights, spacing and size of units for different wall and ceiling conditions, and a average resultant lighting intensity. Vapor proof units for severe service conditions are included. Copies of the catalog are available from the Lighting Division, Westinghouse Electric & Manufacturing Co., Cleveland, O.

Production of malleable iron castings for the first two months of 1937 amounted to 110,933 short tons, compared with 88,800 and 84,777 short tons for the same periods in 1936 and 1935, respectively, the Bureau of Census reports.

# HOBSON'S CHOICE

There is no alternative, buildings **MUST** be artificially lighted.

Somebody is going to light the buildings you design, and that lighting can be friend or foe to the effect you wish to produce.

Lighting left to others or added as an afterthought may ruin the most perfect architectural effect, while lighting planned as an integral part of the structure will bring out lines and textures, tones and colors.

Lighting **CAN** be practical as well as aesthetically effective, but the combination doesn't just happen—it requires careful planning.

In planning, you have many things to consider. We are concerned only with the electrical service of which lighting is a part. We will be glad to check or help plan the details to assure the effect you want.

## FOURTEEN JOBS NOW ON STATE BID CALENDAR

Advertising Flurry, Started  
Last Week, Continued  
By Commission

SACRAMENTO, May 11.—The State Highway Commission swelled its list of major highway projects out for bids to fifteen today by authorizing eight additional contracts for advertising. Bids on all eight projects will be opened in Sacramento June 2.

Work advertised today is located by counties as follows:

**MENDOCINO:** Grading and surfacing with plant-mixed surfacing about 3.1 miles between Sapp Creek and Pepperwood School.

**INYO:** Grading and applying road-mix surfacing on about 2.2 miles between Bishop and Owens River.

**KERN:** Grading and applying road-mix surfacing on about eight-tenths of a mile and constructing a timber bridge, east of Monolith.

**CONTRA COSTA:** About 3.5 miles surfacing with plant-mixed surfacing and constructing and oiling the shoulders between Walnut and 3.5 miles northerly.

**ALAMEDA:** Surfacing with plant-mixed surfacing and constructing and oiling shoulders on about 3.2 miles between Warm Springs and Irvington.

**PLUMAS:** Constructing a reinforced concrete girder bridge across Spanish Creek near Quincy. The bridge will consist of two 30-foot and six 40-foot spans.
